

ACRYLITE®

ACRYLITE®

ACRIFIX® SOLVENT CEMENTS

The advantages of ACRIFIX® solvent adhesives lie in the rapid drying speed of the bonded parts as well as their suitability for outdoor use. With this super thin formula, you can expect a fast-acting bond that's less labor intensive while still providing a nice strong joint.

- ✓ **includes the ONLY methylene chloride free solvent cement**
- ✓ **non-yellowing joints**
- ✓ **made in Germany**

FEATURES & BENEFITS

ACRIFIX® 1S 0116 Pure-V Solvent Cement is a viscous, clear, colorless to slightly yellow, adhesive-free of dichloromethane (methylene chloride). Used for making T-joints and bonding narrow areas of all kinds of uncrosslinked ACRYLITE® acrylic sheet, but also for other plastics such as ABS, PS, and PVC. This cement is only slightly gap-filling. The bond is firm within a short time with high ultimate strength. Conduct prior tests if necessary.

ACRIFIX® 1S 0107 Quick Set is a water thin quick-setting cement.

ACRIFIX® 1S 0117 solvent acrylic cement is a clear, fluid adhesive free of dichloromethane (methylene chloride) and was developed utilizing a patented formula to provide an alternative to types of cement containing dichloromethane.
